Invites You To

**ALASKA PLASTIC
RECOVERY
PRESENTATION**

March 17, 2023

at 6pm

**AT KODIAK FISHERIES RESEARCH CENTER
(TOUCH TANK BLDG)
301 RESEARCH COURT**

Patrick Simpson of Alaska
Plastic Recovery will be
giving a presentation on his
groundbreaking portable unit
that recycles recovered ocean
plastics and plastics #1,2,4

and 5 into a synthetic lumber that can be used
for decking, fencing, park tables and more.
While recycling plastics is not new, the fact
that the processing facility is a portable unit
and can be transported to where the plastics
are gathered rather than shipping tons of
plastics to the facility is a game changer for
coastal communities in Alaska.
